Thursday	Bartolome Island	Bartolome Island	  	Sullivan Bay	Santiago Island		 
Friday	Baltra Airport	Baltra Island					

Description

We're delighted to have you on board for this unparalleled 5-day journey of discovery to some of Galapagos' most beautiful islands. Our itinerary begins on Santa Cruz Island, the most populous in the archipelago, where we explore the lush vegetation of the highlands before venturing down to the world-famous Charles Darwin Research Station to meet giant tortoises face to face. After a day of exploring, we sail to a stunning anchorage at Santa Fe Island for our visit to this sandy white beach with many sea lion harems, a wonderful spot for our first snorkel, kayak or ride aboard our glass-bottom boat. In the afternoon, we disembark amid the waters of South Plaza Island, with its yellow-gray land iguanas munching cactus fruits, and a coastline where we find sea lion colonies and dozens of sea birds. A favourite among many visitors, North Seymour Island offers an enjoyable walk along the coast and the interior of this island, observing numerous bird

colonies as well as sea lions and marine iguanas. Later, we disembark on the north shore of Santa Cruz Island at the glorious white beach of Las Bachas, great for a swim or snorkel. Thursday's expedition starts at Bartolome Island, with its unbeatable volcanic viewpoint, golden-sandy beach and excellent wildlife exploration for snorkelers or glass-bottom boat passengers. Then, we land at the white coral sand beach of Sullivan Bay, ideal for swimming or snorkelling, and walk across a dramatic lava field. End your journey at Baltra airport.

DAY BY DAY ITINERARY

ITINERARY DESCRIPTION

Notes

- Please remember that the exact route and programme may vary according to weather and ocean conditions and the wildlife we encounter. Our Expedition Team is in charge of planning the daily activities and logistics involved. It's also subject to change without previous notice due mainly to readjustment of the National Park policies and regulations.

For accessing the different visitor sites, our skiffs will bring us ashore where two types of landing are expected:

Dry landing: Guests step from the panga (dinghy/skiff) onto rocks or a small man-made jetty.

Wet landing: As the skiff edges onto a sandy beach, guests gently step into small breakers and wade ashore.

Recommendations
